SECURA CLOUD DISASTER RECOVERY

CLOUD DISASTER RECOVERY FOR VMWARE

Streamlined and cost-effective Cloud DR

Secura's Cloud Disaster Recovery solution provides simple, cost-effective disaster recovery protection for any VMware workloads by leveraging VMware vCloud Availability.

This VMware native cloud-based disaster recovery technology enables near instant recovery of protected virtual machines from our Virtual Private Cloud infrastructure.

Easy implementation and management

You can add Secura Cloud Disaster Recovery to any of your VMware-based workloads, from your data centre or from your existing cloud platform.

Simple to configure and operate, replication, migration and failover can be managed completely by you through our self-service web portal, with assistance from our VMware experts.

Secura are a VMware Enterprise Service Provider and VMware VCPP Cloud Partner of the Year 2019.

FEATURES & **BENEFITS**

EASY DEPLOYMENT - SCALE AS YOU GROW

Easy Implementation

Cloud Disaster Recovery can be entirely self-provisioned using VMware vCenter and vSphere Replication, making it easy to implement and adopt DR that will grow in line with the requirements of your IT infrastructure.

- > Compatible with VMware-based workloads
- > Native vSphere Replication
- > Simple Web Portal for easy configuration

Rapid Recovery and Protection

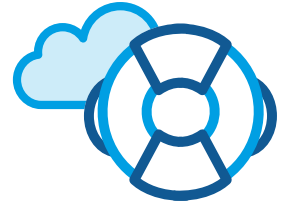

Cloud Disaster Recovery provides near instant recovery of protected virtual machines at the click of a button, through VMware vCloud availability technology.

- > RPO as low as five minutes
- > Retain up to Twenty-Four VMware Recovery Points per VM
- > Rapid recovery of protected virtual machines

You're In Control

Manage your solution via a web portal, where you can define RPO and RTO settings and perform non-disruptive DR testing on demand.

- > Web Portal for easy management
- > Familiar tools VMware vCenter and vSphere Replication
- > Self service or assistance from Secura's VMware experts
- > Sandbox disaster recovery testing

FEATURES & **BENEFITS**

Cost Effective

Cloud Disaster Recovery's flexible per VM pricing, metered storage and usage-based costs make enterprise-level disaster recovery affordable.

- > No additional hardware or software costs
- > Only pay for allocated storage
- > Flexible, per VM pricing

Next-Level Support

Communicate with people who understand your platform and business - whenever you need them.

- > ISO 20000 accredited service desk support
- > 24/7, 365 support coverage
- > Choose a level of management that works for you

ADD DR TO YOUR VMWARE PLATFORM ANYWHERE...

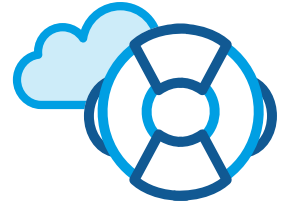

Cloud DR can quickly and simply add native VMware disaster recovery to your VMware platform in your office, data centre or your existing cloud.
